EDUCATION

Organization management – bachelor

Sep 2011 – Jul 2015

National University of Life and Environmental Sciences of Ukraine,
Kyiv

PROFILE

Highly motivated and detail-oriented junior data scientist with an educational foundation in Data Science. Proficient in programming languages such as Python, R, and SQL, with an understanding of statistical analysis, machine learning algorithms, and data visualization techniques. Skilled in leveraging data to uncover insights and support data-driven decision-making. Passionate about applying emerging technologies and techniques, particularly in areas such as computer vision and neural networks. A proactive learner, constantly seeking opportunities to expand knowledge through online courses, research papers, and open-source projects. Eager to contribute to a dynamic organization and gain hands-on experience in a professional data science environment.
